My Vision

“Try to become master in your field but don't think so.”

My Mission

- To create knowledge hunger in students.
- Being medical teacher, I should be active part of knowledge creation (Research), knowledge dissemination (Teaching) and knowledge use for society (treatment of patients).
- As a medical teacher, I should follow the “S-T-T-R Model” (Study-Teach-Treat-Research model).
- To find out success stories in failures.

MBBS in India: What is government doing to improve it?
 In recent years, major developments were seen in this sector and more are in the pipeline. The number of students pursuing an MBBS degree abroad is witnessing a steady rise each year. However, it is essential to acknowledge that the government is making concerted efforts to enhance medical education and upgrade the healthcare infrastructure within the country. "India will be a centre for medical tourism and our medical graduates will be recognised for their contribution to the medical field," says Dr Sunil Natha Mhaske, Dean, Dr Vithalrao Vikhe Patil Foundation Medical College, Ahmednagar, Maharashtra.

REVOLUTIONARY REFORMS: INDIA'S CHANGING MAP OF MEDICAL EDUCATION
 Ministry of Health and Family Welfare (MHFW), in its recent Total Governance Reforms in Medical Education, has highlighted key reforms implemented between 2014-22 to strengthen medical education in India. Here's a consolidated list:

- The National Medical Commission (NMC) Bill**
 It was incorporated in August 2019. The NMC Bill, 2019, for "uniformity, coherence and restructuring of medical education, accountability and quality in the governance of medical education." Four autonomous committees, the Undergraduate Medical Education Board were set up.
- Postgraduate Medical Education Council (PMEC) Bill**
 Proposed in 2019, the PMEC Bill is being implemented. It seeks to address the lack of quality medical education and healthcare in rural and remote areas. All 27 new AIIMS and a few medical colleges have been set up under this.
- The National Board of Examinations in Medical Sciences (NBE)**
 Established in 1975, reforms undertaken by it include the creation of advanced study/virtual learning centres, short term skill enhancement courses, accreditation reforms and several other steps.
- Medical Councils Reforms**
 NEET was introduced in 2019, followed by the National Exit Test (NExT) in 2020. In addition, common counselling replaced medical colleges separately in 2016. All these reforms are aimed at the government's One Nation, One Exam initiative.
- Education and skill-based reforms**
 In 2019, the new competency-based curriculum was introduced. The District Residency Programme of 2021 marks a shift in strengthening the medical infrastructure, it enables PG students to gain exposure and rural hospitals to gain doctors.

Centre for medical tourism
 "India will be a centre for medical tourism and our medical graduates will be recognised for their outstanding contribution in the medical field all over the world," says Dr Sunil Natha Mhaske, Dean, Dr Vithalrao Vikhe Patil Foundation Medical College, Ahmednagar, Maharashtra. He adds that the measures taken by the Centre are oriented towards futuristic healthcare. Increasing the number of seats in both government and private colleges is a significant step, opines Dr Rohan Krishnan, former president of the Federation of All India Medical Association (FAIMA). Dr Mhaske states that this will increase the doctor-patient ratio, while the marginalised sections would get access to good healthcare.
